Domus
VENTILATION

YOUR VENTILATION SPECIALIST

As a leading designer and manufacturer of energy saving ventilation systems, our exclusive ventilation solutions offer a high-quality solution for domestic applications.

With over 40 years' presence in the market, our Domus Ventilation brand has a well-deserved reputation for quality and reliability. The range includes award winning, high performing and energy efficient mechanical extract ventilation appliances and fans; suitable for a wide variety of domestic applications and dwelling sizes.

Ventilation Systems:

- ▶ Mechanical Ventilation with Heat Recovery (MVHR)
- ▶ Mechanical Extract Ventilation (MEV)
- ▶ NOX-FILT

Fan Range:

- ▶ Decentralised Mechanical Extract Ventilation (dMEV)
- ▶ Extract In-Line
- ▶ Extract Axial
- ▶ Extract Centrifugal

Ducting Range:

- ▶ Thermal Ducting
- ▶ Rigid Ducting
- ▶ Flexible, Semi Rigid and Acoustic
- ▶ Internal and External Grilles
- ▶ Fire Solutions
- ▶ Non-combustible Metal Air Bricks
- ▶ Domus Adapt and Radial

HERE'S A SELECTION OF OUR PRODUCTS

VENTILATION SYSTEMS

Our MVHR range ensures the property is well-ventilated and comfort levels are maintained in the home by continuously drawing in fresh, filtered air into the habitable rooms.

- ▶ Listed on the SAP Product Characteristics Database (PCDB)
- ▶ Recover up to 95% of the normally wasted heat
- ▶ 100% automatic bypass
- ▶ Extremely low SFP of only 0.50 W/L/s

Find out more

01

CMX-MULTI

Designed for new build cupboard and ceiling void spaces, suitable for all Residential application.

EXCLUSIVE

02

HRXE-HERA/AURA

HRXE-HERA suitable for studio up to 1 bed apartments, and the larger HRXE-AURA ideal for 2-3 bedroom properties.

LOW SFP

03

NOX-FILT

Prevents 99.5% of airborne contaminants from entering the property, by attaching to the supply leg or mechanical ventilation.

FANS

Our range of bathroom and kitchen fans provide rapid local extraction and include Axial, In-Line, and Centrifugal options. Our range has earned itself a superb reputation for quality, reliability, and ease of installation.

Find out more

04

Axial and In-Line Fans

Quality and reliable. Connect to a short duct run, up to 1.5m, through a wall to an external grille.

EASY INSTALLATION

05

dMEV

Single flow decentralised mechanical ventilation unit for continuous running. Perfect for bathroom/toilet and small/medium size rooms.

06

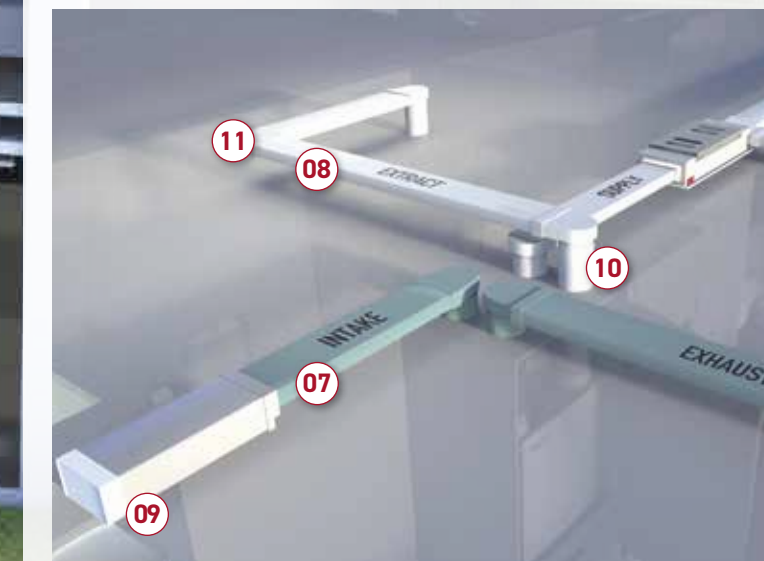

Centrifugal Fans

Suitable for longer duct runs up to 6m in length and can be wall or ceiling mounted.

CEILING VOID

DUCTING

As a branch-based system, rigid duct is ideal for new-build or for where space isn't restricted and can be used with MVHR, MEV, dMEV or intermittent extract. Offering the full ducting solution.

Find out more

07

PATENTED DESIGN

Thermal Duct Insulation

Unique and patented duct insulation solution.

Attenuation

Excellent sound absorption over a range of audible frequencies.

Flow Control Plenum

Engineered to include an integral flow control device.

08

6 PROFILES AVAILABLE

Rigid Ducting

High efficiency duct bends, flexible and semi-rigid ducting, in line adapters, duct terminals, plenums and more!

Radial Ducting

Whole house air distribution systems, which provide simple, quick, and hassle-free installation, to save time and money.

09

EXCLUSIVE

Solis Air Brick

Designed as a non-combustible air brick to maintain low resistance and comply with the latest standards.

10

Fire Solutions

Prevent the spread of fire where rigid ducting penetrates fire compartment walls.

Rigid Ducting Round

Suitable for bathroom, toilet and utility room applications.

11

INNOVATIVE SOLUTION

Greenline Bends

Significantly reduces duct resistance, lower system noise and overall energy usage.
